

DEBASHIS SATAPATHY

Software Developer | Java, Spring Boot & Microservices

+91-8144085077 | debashissatapathy2003@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Aspiring Software Developer with hands-on experience building full-stack and microservices-based applications using Java, Spring Boot, Spring Security, Spring Data JPA, and MySQL. Skilled in designing REST APIs, implementing JWT-based authentication, and collaborating in team environments. Strong problem-solver, quick learner, and committed to writing clean, production-ready code.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, SQL
- **Backend Development:** Spring Boot, Spring MVC, Microservices, REST APIs
- **Security & Authentication:** Spring Security, JWT
- **Databases:** MySQL, PostgreSQL
- **Testing & API Tools:** Postman, Swagger
- **Version Control & Build Tools:** Git, GitHub, Maven
- **Frontend:** HTML, CSS, JavaScript, Bootstrap
- **Core Competencies:** Problem-Solving, Team Collaboration, Communication

WORK EXPERIENCE

Java Intern

Rinex — Remote

- Completed a 60-day intensive Core Java internship, building and debugging Java applications with a focus on Object-Oriented Programming (OOP), JDBC, Collections, and Exception Handling.

PROJECTS

DineHub – Restaurant Management System [\(GitHub\)](#)

- Engineered a full-stack restaurant management platform, implementing secure user authentication and role-based access control to protect customer and admin data.
- Designed and developed RESTful APIs using Java, Spring Boot, Spring Security, and Spring Data JPA, enabling seamless menu browsing, cart management, and order processing workflows.
- Implemented end-to-end CRUD functionality across menu, cart, order, and user modules, integrated with MySQL for reliable, persistent data storage.
- Built a responsive front end using Thymeleaf, HTML, CSS, and Bootstrap to deliver a smooth, user-friendly ordering experience.
- Technologies: Java, Spring Boot, Spring Security, Spring Data JPA, MySQL, REST APIs, Thymeleaf, HTML, CSS, Bootstrap.

Patient Management System – Spring Boot Microservices [\(GitHub\)](#)

- Architected a microservices-based patient management system, decoupling patient records and appointment scheduling into independently deployable services for improved scalability and maintainability.
- Developed and integrated RESTful APIs with full CRUD functionality using Spring Boot and Hibernate/JPA, ensuring efficient data access and reduced query overhead.
- Built a dynamic, component-based front end with React.js to streamline patient record management and appointment booking for end users.
- Integrated MySQL as the persistent data layer, maintaining data consistency and integrity across distributed microservices.
- Technologies: Java, Spring Boot, Microservices, React.js, MySQL, Hibernate/JPA, REST APIs.

EDUCATION

Bachelor of Technology in Computer Science & Engineering (Data Science)

Gandhi Institute of Engineering and Technology (GIETU), Gunupur | Aug 2021 – Jun 2025

CERTIFICATIONS & AWARDS

- 5-Star Badge in Java, Python, and MySQL — HackerRank
- AI for India 2.0 — Skill India (Python)
- Completed training in Java Full Stack Development, Python, SQL, and Web Development

ACHIEVEMENTS & EXTRACURRICULARS

- Delivered multiple production-ready, full-stack web applications using Java and Spring Boot, applying strong debugging and problem-solving skills.
- Proactively mastered Java, Spring Boot, Microservices architecture, and modern backend development practices through independent, hands-on project work — reflecting a strong self-learning mindset.
- Recognized for taking ownership of tasks, rapidly learning new technologies, and maintaining a positive, solution-oriented approach in team environments.
